

Stock and surface

A short report on the four papers.

AUTHOR

DATE

1 April 2026

STATUS

Draft

1 Surfaces

Each stock re-points the semantic layer. Build against the semantic tokens and a document inherits theming and AA at once.

NOTE

Marigold is a ground, not a tint. Use it full bleed behind dark text.

2 Roles

The text roles are primary, body, secondary, and muted. All clear AA on the page surface of every stock.
